CSE Department

ACKNOWLEDGEMENT

“It is not the brain that matters the most, but that which guide them: the character, the heart, generous qualities and progressive force.” The satisfaction that accompanies the successful completion of any task would be incomplete without the mention of people who made it possible, whose constant guidance and encouragement crown all the efforts with success. Thus, the successful completion of this project is attributing to the great and indispensable help we received from different people. “No single achievement of a person can be attributed to efforts alone, there are always helping hands that shape the effort into tangible form.” First of all, We pay our regards to constant guidance and encouragement received from our Director Dr. Rajeev Agarwal, Ms. Priyanka Rahi, our mentor and Dr. Kakoli Rao, Head of the Department (CSE) LIET, Greater Noida. We would also like to acknowledge our immense gratification to our fellow classmates, our respected family members and friends for their invaluable support and inspiration. The help received from each and every one directly or indirectly is duly acknowledged.

ABSTRACT

This project, **STUDENT COMPLAINT MANAGEMENT SYSTEM** is an online platform designed to streamline the process of handling student grievances in educational institutions. This system allows students to submit complaints regarding academic, administrative, or facility-related issues. The complaints are categorized, tracked, and resolved by authorized personnel within the institution. Key features of the system include an easy-to-use interface for submitting complaints, a real-time tracking system for both students and administrators, and a notification mechanism for updates on complaint statuses. Additionally, the system provides a feedback and rating mechanism to assess the effectiveness of complaint resolution. The project aims to enhance transparency, improve communication between students and management, and ensure timely resolution of issues, ultimately fostering a positive educational environment.
